For even greater safety, the composition of Pyragranite Sinks provides protection against bacteria. Bacteria can cause mould, stains and bad smells. The enrichment of the composition with silver ions makes the surface of the sink, perfectly healthy and suitable to come in contact with food.

As proof of the exceptional quality materials, Pyragranite Sinks carry a Lifetime Guarantee.

Pyragranite sinks are manufactured from 80% natural quartz (silica) which is the hardest and strongest component of granite, while the remaining 20% of the mixture, consists of resins and other substances that assist in binding the grains of quartz and help to achieve excellent color appearance of the surface of the sink.

In addition to PYRAMIS quality control procedure, Pyragranite Sinks have been also tested and certified by the prestigious German Institute for Certification L.G.A. These certificates guarantees that Pyragranite Sinks have passed the most demanding quality standards in terms of mechanical strength, hygiene and safety.

**HEAT RESISTANCE**

Sink's resistance to heat reaches 280° C.

**SHOCK RESISTANCE**

The sink withstands the shock of an object that weighs 1Kg and drops from height of 70cm.

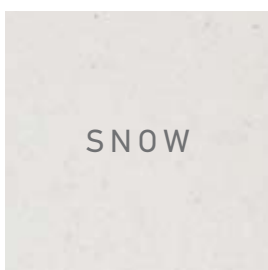

**RESISTANCE TO CHEMICALS**

Discoloration is prevented even in the use of strong chemical cleaners.

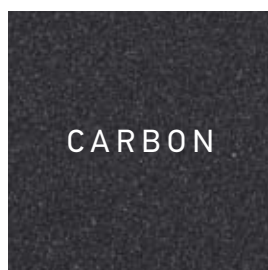

**SCRATCHING RESISTANCE**

The high percentage of mineral charges in the mixture, makes Pyragranite Sinks very resistant to scratches, marks and wear.
